TOMORROW'S TECHNOLOGY FOR TODAY'S SECURITY

## XIS-5335

## Superior Compact Screening Checkpoint Security: Mail and Small Parcel Inspection

### TRANSPORTATION

Airport entrances and perimeters,  
air cargo, and checkpoint technology.

### PORTS & BORDERS

Border control, sea ports, and  
other large cargo sectors.

### CRITICAL INFRASTRUCTURE

Access control for prisons, courthouses,  
mailrooms, hotel entrances and  
military bases.

The XIS-5335 is a compact X-Ray Inspection System with tunnel dimensions 53.3 cm x 35.4 cm (21" x 14"). The XIS-5335 is the smallest system in the XIS series and is designed for screening objects ranging from mailroom parcels to purses and backpacks.

The XIS-5335 has been installed at various checkpoint locations including government buildings, private hotels, and corporate mailrooms. Mounted on a compact frame with heavy duty roller casters, the XIS-5335 can be easily relocated to any site in need of an immediate screening solution.

The XIS-5335 offers the best in compact checkpoint security: quality, low cost ownership, flexibility and performance.

All Astrophysics X-ray Inspection Systems are equipped with Real-Time Diagnostics, a unique Astrophysics feature which allows users to monitor system health. This software was specifically engineered to save you valuable time and money. If requested, Astrophysics would also be able to connect to your system and troubleshoot any issues remotely.

An exclusive Astrophysics option is our 6 Color Imaging, which enables operators to view screened objects in 6 colors, each color correlating to a specific range of Atomic Z-Numbers. 6 Color Imaging enables operators to achieve optimal material identification which improves throughputs.

Astrophysics is committed to providing quality products and services nationwide. We listen to our customers and offer customizations and order flexibility based on their needs.

Backed by a team of engineers from our City of Industry, California center of excellence headquarters, Astrophysics designs cutting-edge X-ray screening technology for detecting weapons and contraband for transportation, ports, borders, critical infrastructure and other industries that present security risks.

Astrophysics is headquartered in the United States and maintains a global presence with service delivery worldwide. Astrophysics is committed to global safety and is proud to present this new age of screening security—driving the industry into the technology of tomorrow.
